CHANGE IN NON-GAAP FINANCIAL MEASURE

Prior to fiscal year-end 2020, the Company's calculation of a diluted per share amount of Adjusted Net Income included an adjustment to fully dilute this non-GAAP measure for all outstanding share-based compensation grants. This additional dilution was incorporated by adjusting the GAAP measure, Weighted Average Shares Used for the Computation of Basic earnings per share, as presented on the Consolidated Statements of Operations, to include a dilutive effect for all outstanding RSAs, PSUs, and stock options. Beginning with the fiscal year-end 2020 presentation and for all subsequent periods, the Company will no longer include this additional dilution impact in its calculation of Adjusted Net Income per diluted share. The Company has instead utilized the Weighted Average Shares Used for the Computation of Basic and Diluted earnings per share as presented on the Consolidated Statements of Operations to calculate Adjusted Net Income per diluted share for all periods presented herein.

The Company believes that, because its outstanding share-based compensation grants no longer result in a material amount of dilution of its earnings as was the case nearer to the date of our IPO, the adjustment methodology previously used no longer provides meaningful information to management or other users of its financial statements. This change resulted in an increase of \$0.01 in the six months ended December 29, 2019 in the amount of Adjusted Net Income per diluted share from what was previously reported.
